

WINDRIDGE INTERNET USE POLICY

NAME - DATES

After many onsite meetings with internet providers and searching for a way to provide internet service to the log house (cable was unavailable and dialup too slow) we found the Verizon's Jetpack modem/router combination, to once again work best.

The only drawback is a usage limit of 50GB per MONTH and is shared by ALL guests. Therefore this service is **NOT** appropriate for internet gaming or large downloads/streaming such as video or audio files. However, your allotted amount should be more than enough MB's to check email, Facebook and for simple Google searches for local activities, restaurants, addresses, directions, etc.

The maximum amount of fair usage for each rental term is **1-2GB/day**; that is the same amount whether there is one person or six! Guests who exceed their total allowance will be depriving other guests of their share of the monthly allowance and will be charged \$.20/MB from their Good Care deposit. You can monitor your use at www.verizonwireless.com, sign in using the user name: 1loghouseva and password 1loghouse; next to "My Usage" click on "View Usage Details". This is NOT a super fast internet service and should be turned off when not in use or at least nightly; also eliminating any mystery usage. (There is free internet at McDonald's, Starbucks & Panera Bread, all in Leesburg.)

Please understand that the usual rules apply as for any public computer:

- This service is not to be used for any illegal purpose.
- We are not responsible for any harm that may come to your computer as a result of using the service we provide to our guests.
- Service is not guaranteed.
- We are not technicians and cannot help you with your computer.
- The router must **not be removed** from the house; the Good Care deposit will not be returned if it is.

All references in the main contract to "items", "property" or "equipment" include the router.
