

## WINDRIDGE INTERNET USE POLICY

After SO many onsite meetings with internet providers, a few 30 day trials which ended before 7 days and searching for a way to provide internet service to the log house, we now have a new provider, StarLink.

We have not found there to be any drawbacks but have been warned that during peak times (5pm - 11pm) it could be slow and that dense clouds/rain/snow can also hinder satellite transmission. We have participated in a ZOOM meeting but with just the two of us here, so not sure how the speed would be with other guests being online at the same time, especially streaming concurrently. There is no usage limit at this time but have also read that the speed will slow with excessive use, so again no gaming is allowed.

The modem/router is in the basement utility room. PLEASE do not change anything there, even turning it off and on again, without discussing with me first.

Please understand that the usual rules apply as for any public computer:

- This service is not to be used for any illegal purpose.
- We are not responsible for any harm that may come to your computer as a result of using the service we provide to our guests.
- Service is not guaranteed.
- We are not technicians and cannot help you with your computer.
- The router must **not be moved at all**; fees will occur if it is.

All references in the main contract to "items", "property" or "equipment" include the router.

By your payment you are accepting the above information and responsibility entailed.
